

Anna Fokidou

Custom websites • Information architecture
Multilingual digital products

BASED IN BELGIUM

Remote / mostly remote roles
Website design • Front-end website building
Content structure • Digital product thinking

I design websites and digital products that bring structure to complexity.

I create custom websites, embedded tools and content-first digital products with a strong focus on content structure, multilingual experiences and long-term scalability.

Starting from a blank page, I combine website design, front-end implementation, responsive layouts and information architecture to turn ideas into clear, usable and expandable digital experiences.

My path combines design, real estate, technical documentation and digital product creation. Today, I use that background to make complex information easier to understand and use.

Embedded widgets • Content-first platforms • Buyer-facing decision flows • Publishing-ready structures • Responsive implementation • Scalable website structures

CORE EXPERTISE

Website Design

Layout, typography, navigation, visual hierarchy and user-friendly page structures.

Front-end Building

HTML, CSS, responsive implementation, UI refinement and website maintenance.

Information Architecture

Organising complex content into clear, logical and scalable digital experiences.

Content Systems

Articles, galleries, multilingual content, reusable sections and publishing flows.

SELECTED DIGITAL PRODUCTS & WEBSITE PROJECTS

SMAart Insight

BUYER DECISION LAYER

Designed and built a buyer-facing decision-support application for real estate listings, helping users explore acquisition costs, renovation assumptions, rental inputs and property-use scenarios before contacting an agent.

UX • Information Architecture • Decision Flows • Responsive UI • Multilingual Structure

[View live pilot](#) →

Clarity Advisory

SERVICE WEBSITE

Designed a multilingual website foundation for consultants, advisors and service businesses, with structured service pages, article publishing, method section and a clear contact flow.

Custom Website • Service Pages • Content Architecture • Multilingual • Contact Flow

PROFESSIONAL JOURNEY

Digital Product & Website Builder

SMAart Insight
2024–Present

Created a buyer-facing real estate decision layer from concept to working product, including interface structure, content flows, scenario guidance, multilingual patterns and responsive front-end implementation.

Current focus: turning complex real-world decision processes into clear, usable and maintainable digital experiences.

Technical Drafter

AutoCAD 2D
2019–2025

Worked with technical drawings, electrical schemes, red-marking revisions and structured documentation in a complex industrial environment.

Strengthened precision, technical reading, documentation discipline and the ability to translate complex information into clear structured output.

Dossier & Process Management

Stad Gent
2016–2017

Managed administrative dossiers, permits and supporting documentation within formal procedures, preparing information for review and decision-making.

Built a strong foundation in process clarity, documentation flow and careful information organisation.

Real Estate Office Owner

Athens
2003–2007

Owned and operated an independent real estate office, guiding buyers through property information, renovation implications, additional costs, appointments and practical decision-making.

This experience became the foundation for SMAart Insight and my interest in buyer-facing decision support.

Design, Retail & Operations

Athens
Earlier experience

Worked across furniture, decoration, gallery operations and administrative roles, combining product presentation, customer guidance, organisation and commercial awareness.

Developed the practical ability to connect visual presentation, user needs and operational structure.

EDUCATION & PROFESSIONAL DEVELOPMENT

Graphic Design & Interior Design

Foundation in visual composition, spatial thinking, layout and presentation.

ArcGIS

Spatial information, map visualisation and geographic analysis.

Web Development

HTML, CSS, responsive websites and front-end website building.

Real Estate Training

Property transactions, buyer guidance and practical acquisition context.

AutoCAD & Technical Drawing

Technical drawings, construction logic, accuracy and structured documentation.

AI-assisted Workflows

Using AI tools to support product structure, documentation and website development.

TECHNICAL & CREATIVE KEYWORDS

Website Design • Front-end Development • HTML • CSS • Responsive Design • UI Design • UX Thinking • Information Architecture • Content Architecture • Multilingual Websites • Content Publishing • User Flows • Website Maintenance • Technical Documentation • Digital Workflows • AI-assisted Development

LANGUAGES

Greek — Native
English — Strong written communication; comfortable speaking in professional contexts
Dutch — Conversational

My professional path spans design, real estate, technical documentation and digital product creation. Today, I combine these experiences to design websites and digital products that make complex information easier to understand and use.
